➤ PROJECTS

ANTI-THEFT FLOORING SYSTEM

This is a smart monitoring system, which is made for security purpose. It helps to monitor the area in which it is implemented. If any intruder enter into this area then the buzzer of the system will get on and send an alert message with the photo and video of that intruder to the owner of that place.

ARDUINO BASED WATER IRRIGATION SYSTEM

The main objective of this project to provide water to the plants or gardening automatically using microcontroller. We can automatically watering the plants when we are going outside. Farmers has no need to visit their farm for watering.
