Dear Hiring Manager,

I am writing to apply for the Cost Optimization and Contracts Management role at Total Energies, as advertised. With a Bachelor's degree in Mechanical and Automation Engineering and a solid background in the utilities industry, I am excited about the opportunity to contribute to Total Energies' growth in renewable energy projects.

In my current role as a Projects & Contracts Associate at National Central Cooling Company (Tabreed), I have developed a strong skill set in negotiation, contract establishment, and stakeholder management. I have successfully spearheaded EPC projects in the GCC region, overseeing tendering processes and contract establishment, achieving significant cost savings.

Prior to my current role, I worked as a Sourcing Intern at GE Grids Solutions, I gained experience in structured and competitive bidding processes for turn-key electrical substation projects. During this time, I developed strong negotiation skills and assisted in the preparation of RFP tender packages, ensuring technical compliance and cost-effectiveness.

I also held a trainee position at the International Renewable Energy Agency, where I focused on renewable energy projects and conducted research on hybrid-grid systems and methodologies for energy efficiency in small island developing states (SIDS). This experience has provided me with a deep understanding of the renewable energy sector and the ability to analyze opportunities from multiple perspectives, as required by the Business Developer role.

I am fluent in English and have a track record of cultivating solid relationships with stakeholders across various sectors. I am eager to leverage my skills in negotiation, deal structuring, and partnership development to support Total Energies' reputation and contribute to its growth in solar, onshore wind, and hydro projects.

Thank you for considering my application. I am enthusiastic about the opportunity to join Total Energies and contribute to its success in renewable energy development. Please find my resume attached for your review.

Warm Regards,

Mohamed Ziyad
