Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Commercial Leadership Program at GE Vernova. With a strong background in mechanical and automation engineering coupled with hands-on experience in project management and technical problem-solving, I am excited about the opportunity to contribute to GE's innovative projects and technical advancements in the gas power industry.

During my tenure as a Projects & Contracts Associate at the National Central Cooling Company (Tabreed), I spearheaded EPC District Cooling Plant projects, managing tendering processes, and implementing category strategies for various major equipment such as MV transformers, chillers and heat exchangers. This experience has equipped me with a deep understanding of project lifecycle management, technical specifications, and procurement processes, all of which are integral to the success of engineering projects within GE Gas Power.

My technical proficiency extends to my academic background in mechanical and automation engineering from Amity University, Dubai. Through coursework and practical projects, I have developed a solid foundation in thermodynamics, fluid mechanics, and electrical systems. Additionally, my internship experience at GE Grids Solutions involved supporting global sourcing initiatives for electrical substation projects, further honing my technical skills and industry acumen.

Thank you for considering my application. I am highly motivated to join the esteemed team at GE Vernova and am confident that my technical background and enthusiasm for engineering innovation make me a strong candidate for the Commercial Leadership Program. I look forward to the possibility of discussing my qualifications in more detail.

Warm regards,

Mohamed Ziyad
